©2009 Extreme Solutions

Our client, an exciting online retailer seeks to hire a full time experienced ATG Developer. **STRONG** communications skills required! Minimum of 2-3 years ATG Development Experience a **MUST!!**

ATG Application Development will be the key responsibility for this person. This will include providing technical guidance with the ATG application design and architecture, integration design and architecture, and enforcement of technical standards. The ATG Application Developer will work closely with the business community and the Information Technology management team.

### **Duties & Responsibilities:**

Each of these listed responsibilities must be performed to be considered successful in the execution of this job:

- Build upon commercial web applications (ATG application server, content management personalization engine, and ATG commerce platform with customer code).
- Develop and document customizations to meet the client's requirements including system design, database changes, screen changes, security definition, workflow flowcharts, and custom documentation.

- Business needs must be translated into effective technical solutions using several core technologies like Java, J2EE, EJB, JSP, Oracle, SQL, HTML, and XML.
- Suggest innovative solutions to business problems/processes that leverage technology to provide marketing differentiation, efficiency improvements, and better user experiences.
- Works with EAI (Enterprise Application Integration) team to design the integration between ATG and external systems using the TIBCO application.
- Works with the Enterprise Architecture team to ensure any application architecture design decisions fit within the overall architecture design driven by the enterprise architecture team. Will also be consulted as a resource by the enterprise architecture team in enterprise wide projects that will interface with ATG.
- Perform Design reviews with ecommerce development teams onshore and offshore.
- Contribute to deployment strategies with deployment engineers.

Other duties, assignments and specific projects may be assigned at the discretion of management. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

### **Job Requirements:**

- Bachelors Degree in Computer Science or MIS
- 2-3 years of ATG development experience (Commerce, B2B Order Management, etc.)
- 7-10 years of development experience

Extremely Good People for Extremely Good Companies

- 5-7 years with Java (J2EE, EJB, JSP) development
- Coding languages and environments including but not limited to Java, J2EE, EJB, JSP, SML, and HTML
- Experience with Java Development on an Eclipse Platform
- JBOSS experience or similar application servers
- Familiarity with LINUX Red Hat, UNIX, Windows system configuration (networking, file systems) or Network configuration
- Familiarity with Enterprise Application Integration (e.g. TIBCO, WebMethods, Websphere MQ)
- Familiarity with service oriented architectures
- Experience with search engines (Verity, Endeca, iphrase, etc.)
- Experience with analytics, transaction processing (CyberSource, ClearCommerce, Payment tech, etc.)
- Strong Communication skills to write documentation for design and architecture documents.
