

SharePoint Developer – Portland, OR

©2008 Extreme Solutions

Our client, an interactive marketing and business intelligence company that delivers data-driven business solutions, is seeking a SharePoint Developer to join their growing team in Portland, OR. Their business helps their clients make better decisions about business operations based on better data and the pairing of that data with strategies.

What the Job Entails:

As a SharePoint Developer, you will take part in redefining the Microsoft Office SharePoint Server space as you deliver solutions that meet the clients' needs. You'll be a part of our clients' national practice in consultancy and be able to sharpen and grow your skills in your area of business consulting and technology.

Minimum Requirements:

- Minimum of two years experience with Microsoft SharePoint 2003 or 2007 and MOSS technologies, including Web part development, site definitions and features.
- Two plus years experience developing with MS Infopath, including Infopath 2007.
- Minimum of five years experience with the .NET Framework, including .NET 2.0 or 3.0 (C# preferred).
- Minimum two years experience creating site definitions as well as configuring and customizing SharePoint sites.

- Experience deploying Features as SharePoint Solutions.
- Working knowledge of cascading style sheets (CSS), JavaScript and HTML.
- Working knowledge of Forms Server and Excel Services.
- Proven ability to integrate SharePoint with a variety of business systems.
- Ability to create custom controls for .NET
- Experience with SQL Server Reporting Services.
- Experience with Windows Communication Foundation and Windows Workflow Foundation.
- Experience with ASP.NET Security, including Forms Authentication using SQL and Active Directory providers.

Location of Position: Portland, Oregon

Compensation Plan:

Salary Range: \$75-\$85K DOE

Standard benefits package part of total compensation package.

Desired Start Date: ASAP
